

Copper lead cable

11/04/23

Description

Copper Lead Cable - for any constructions when requested grounding by means of an earth core laid beneath the foundation. The section of the earth core equals at least a geometric section of 35mm².

Cable construction

Conductor: copper wire according to IEC 60228 class 1 - 10 mm²

Lead sheath: thickness. 1.6 ± 0.1mm

Conductor resistance at 20°C according to IEC 60228 class 1

Number of wires and nominal cross section 1x10/35 mm²

Construction data Cu /Pb 1x10/35

Outer diameter approx. 6.7 mm

Copper weight: 83 kg/km

Cable weight approx. 382 kg/km

Afmetingen, kleur en gewichten zijn ter indicatieve titel en onder voorbehoud van wijzigingen.
